

Hyperion Extracts Request Form

Version 3.1 | Updated March 5, 2018

I. Directions

- Make sure your HCM is correct. Check your Departments, Department Budget Table, Positions, and Employee data carefully. For more information, please refer to the PeopleSoft Hyperion Announcement posted on 2/16/17 titled [HCM auditing prior to pulling extracts](#) or the CRC Website > Resources > PeopleSoft Resources > Guides and Job Aids > Hyperion.
 - Complete this request form (Part II).
 - Create a HEAT ticket and attach this form to the ticket.
 - Once the extracts have been created and are ready to load into your application, you will receive a notification from the CRC that your application is in maintenance mode.
 - Please notify your staff that your application will be unavailable while the extracts are loaded.
- NOTE: Once your data is loaded, your Hyperion is a production environment and is no longer a practice (Sandbox) environment.*

II. Request Form
